Education

University of Stuttgart

Exchange semester at the university of Stuttgart focusing on machine learning and autonomous robotics

Spring semester 2025
Stuttgart, Germany

UiB

Break from Master's degree doing a single year programme of pedagogy at University of Bergen

2021 – 2022
Bergen

NTNU

Master's degree in "Cybernetics and robotics" at the Norwegian University of Science and Technology

2020 – Present
Trondheim

- > Specialization in Autonomous Systems with focus on statistics and estimation techniques.
- > Master's thesis about Kalman filtering on novel glucose measurement technique for patients at ICU

Experience

Arm Norway

Summer intern

Jun. 2024 – Aug. 2024
Trondheim

- > Joined the GPU team as a hardware engineer
- > Worked with designing RTL using SystemVerilog
- > Got hands on experience working in comprehensive testing and verification environments

Nordic Semiconductor

Summer intern & Part time employee

Jun. 2023 – Dec. 2023
Trondheim

- > Worked full time through the summer as a student intern, and then part time during the autumn semester
- > Main focus on web development using the Django framework with python, with implementation of databases and authentication
- > Got aquatinted with using tools like Docker, git, and to team-based workflows using Jira

NTNU

Senior student assistant

Sep. 2022 – Jun. 2023
Trondheim

- > Was responsible for organizing and leading the laboratory sessions for the course
- > Gained experience in organizing student activity, maintaining safe practices and coordinating student assistants
- > Worked in cooperation with the professor on creating new exercises for the course and improving the quality of the assignments

Skills

Programming languages & frameworks Python, Matlab, ROS, C++, SystemVerilog, Django

Technical knowledge Linux, Git, Docker, Altium designer, CAD software

Languages Native: Norwegian, Fluent: English, rudimentary: German
